GARNITZENKLAMM GORGE HIKE

(UNTIL APPROX. MID-OCTOBER)

FRIDAY

Fascinating and colourful rock formations have been created here by roaring, emerald-green streams: Garnitzenklamm Gorge is one of the longest gorges in Austria, a place to recharge your batteries. Many forces have contributed to the formation of the gorge and this landscape. Those who set out with our hiking guide on the 6.6 km circular hike will learn a great deal about the power of water, how it has carved its way through the rock over thousands of years and how the rocks themselves have influenced the formation of the gorge.

GEOTRAIL HIKE

„KRONALM“

FRIDAY

Discover traces of times long past along the Geotrail on former seabeds: that's what the "Kronalm" hike promises. Around 300 million years ago, the Nassfeld region lay directly on the coast of a sea. Fossil-rich limestone formed in the shallow water, while rivers deposited sand and gravel near the coast, which solidified over time. Fluctuations in sea level created alternating layers of these rocks around the Auernig. This sequence reaches a thickness of 600 - 800 m and is known as the Auernig Formation. Its numerous fossilised marine creatures and rocks can be explored along the Geotrail. Ideally together with our hiking guide. Starting from the Gartnerkofel mountain station, the route leads towards Garnitzenalm and continues up to Garnitzenberg (1,960 m). After the tour, there is an opportunity to stop for refreshments at Berghex.

FRIDAY

The bike bus takes you comfortably to the border at Thörl-Maglern. From here, we start this beautiful, approximately 65 km bike tour through the Canal Valley. As the route is mostly gently downhill, it is suitable for everyone. Our destination: the medieval town of Venzone with its unique city walls and romantic central square – today also known as the City of Lavender!
